What can we imagine them saying?

I want a secure and user-friendly voting proces s.

We want transparency and fairness in the election proce

We need a system that's easy to set up and manage.

I hope my vote is counted accurately and remains confidential.

Election integrity is essential for a stable democracy.

Efficiency and accuracy are crucial for a smooth election

VOTER

We observe the voting process, access real-time data, and report any anom alies

I oversee the system's configuration,

I'm concerned about potential hacking or fraud.

We're constantly working on updates to stay
